$CIRCUS Tokenomics

1. Token Details

- **Token Name:** Circus Token

•**Ticker:** $CIRCUS

- **Blockchain:** Ethereum (ERC-20) *(or you can replace with Solana, BSC, etc.)*

- **Total Supply:** 1,000,000,000 $CIRCUS

- **Decimals:** 18

2. Allocation

Category	Percentage	Amount	Notes
Public Sale (IDO/ICO)	35%	350,000,000	Raise funds and build community
Team & Advisors	15%	150,000,000	12-month cliff, 24-month vesting
Ecosystem/Rewards	20%	200,000,000	For staking, games, partnerships
Treasury/Development Fund	15%	150,000,000	Future development, marketing
Liquidity Provision	10%	100,000,000	DEX liquidity pools
Airdrops & Community Incentives	5%	50,000,000	Early supporters and viral campaigns

3. Release Schedule

Public Sale: 100% unlocked at TGE (Token Generation Event)

Team/Advisors: 12-month lockup (no tokens unlocked)

Linear vesting over next 24 months

Ecosystem Rewards: Emissions over 5 years, decreasing by year

Treasury: 10% available at launch, rest vested over 3 years

Liquidity: 100% used immediately for DEX pools and market making

Airdrops: 50% at TGE, 50% unlocked over 6 months

4. Utility of $CIRCUS

Governance: Vote on decisions like new features, NFT drops, game expansions.

Access: Entry to exclusive Circus-themed games, events, and metaverse shows

Rewards: Staking to earn rare NFTs, VIP tickets, merchandise.

Payment: Use $CIRCUS to buy in-game items, NFT characters, and virtual experiences.

Burn Mechanism: A portion of transaction fees (e.g., 1%) is burned to create deflationary pressure.

5. Fundraising Goals (example)

Soft cap: $1M

Hard cap: $5M

Token Price (Public Sale): $0.01 per $CIRCUS

Vesting for Public Sale Buyers: No vesting, instant access

6. Key Features for Growth

Deflationary Model: Regular burns tied to platform activity.

NFT Integration: Exclusive NFT collections for top holders.

Play-to-Earn Games: Use $CIRCUS to play and win real rewards.

Yield Farming: Stake $CIRCUS in carnival-themed farms for high APYs.

7. Long-Term Vision

Build a **Circus Metaverse** where NFTs are playable characters.

Host **virtual shows** where NFT holders can win $CIRCUS and rare collectibles.

Expand to **cross-chain** with bridges (Polygon, Arbitrum, Solana versions of $CIRCUS).

Integrate a **DAO** to fully decentralize the project.
